

## A Technology Fair Project

### Introduction And Problem Addressed

Greet visitors to your stand. Introduce your team and give an overview of the community problem you are addressing and why you have decided to tackle it.

### Explanation Of Your Invention

Describe your invention and explain how it works. Use visual aid to illustrate your idea.

### Importance To The Community

Explain why your invention is important and useful to solve the community problem.

### Conclusion

Summarize the key points of your presentation and thank visitors for their interest and participation.

### Q&A

Encourage the audience to ask questions and gain a deeper understanding of your invention. Brainstorm and anticipate questions that the audience might have.
